ALPINE MOUNTAINEERING AND TECHNICAL LEADERSHIP PART 3a

AID, BIG WALL TECHNIQUES, AND REMOTE EXPEDITION

Bellingham, WA

EQUIPMENT CHECKLIST

The primary goal of any alpine climber should always be to carry as little as possible. What is left out of a backpack is often just as important as what is placed inside. Conditions in the mountains vary dramatically from season-to-season and sometimes even throughout the same day. This can make the process of preparing equipment for an alpine climb difficult. On the one hand, a climber wants to be light. But on the other, a climber wants to have everything he or she needs if there is a storm.

This list was designed for the “worst case scenario” trip with significant inclement weather. In serious conditions it’s not uncommon for a climber to need every piece of clothing and equipment on this list. However, if a program does not encounter significant weather, there may be items here that are not used. As you prepare for your trip, it’s important to plan for the worst and hope for the best.

On the first day of your program, an AAI guide will work with you to refine your mountain kit to ensure that you bring exactly what’s needed given the forecast. It is acceptable to bring too much clothing or equipment to your initial meeting. And it is acceptable to bring things that you have questions about. Extra equipment can always be left behind at the AAI shop.

The Cascade climbing season is defined as May 1st through October 1st. This list references Early, Mid, and Late-season conditions. These periods of the climbing season are roughly defined by the different types of weather and snow conditions you are likely to encounter:

- **Early-Season Conditions** (May 1st-July 1st): There is usually significant snow both on the ground as well as on the glaciers. Climbers should expect to encounter deep wet snow during the day and firm conditions at night. Overnight temperatures range from 15° to 40°F (-9-4°C). Daytime highs range from 35° to 70°F (1-21°C). Precipitation as snow or rain is likely in the early-season.
- **Mid-Season Conditions** (July 1st-September 1st): Temperatures range from 40 to 50°F (4-10°C) at night, with occasional dips down below freezing. Daytime temperatures often reach 70°F (21°C). Climbers should expect the possibility of freezing temperatures above 9000ft on summit days throughout the summer season. And though mid-season tends to be dryer in the Cascades, the possibility of rain is still always there.

- **Late-Season Conditions** (September 1st-October 1st): September is a varied month. Temperatures begin to drop both during the day and at night. Late in the month, it is possible that you will encounter an increase in snow or rain.

Please be sure to check the forecast several days prior to your course to ensure that you are properly prepared.

[NOAA Mt. Baker-Snoqualmie National Forest Weekly Forecast](#)

PROVIDED EQUIPMENT: Climbing rope, anchors, solid waste bags

RENTALS: Equipment that is available for rent through the AAI Equipment Shop is designated with a “ Rent” check box. These items may be rented on the first morning of your course during your rendezvous. It is possible to reserve rentals ahead of time but due to an extensive inventory it is not necessary. Please call the shop if you have unusual sizing issues (either large or small), as those items are limited.

Underlined items in this form are hyperlinked to examples available in our Equipment Shop. Don't forget that AAI climbers receive a 15% discount off full-price items purchased through our gear shop!

Call or E-mail the Equipment Shop for Advice on Gear

Please feel free to contact us and to let us help you get ready for your climbing trip. Your comfort and safety depend on being well equipped. Whether you get your gear from us or just get advice, we're here to help you prepare.

| Clothing | Packing Checklist |
|---|--|
| <p>Beanie/Toque Wool or synthetic, must fit under helmet. Easily replaced with hooded layers after early-season.</p> | <input type="checkbox"/> Own <input type="checkbox"/> Buy |
| <p>Sun Hat Preferred to fit under helmet.</p> | <input type="checkbox"/> Own <input type="checkbox"/> Buy |
| <p>Buff/Neck Gaiter Look for one that is UPF rated. Brighter colors work better for warmer conditions and darker colors for colder conditions.</p> | <input type="checkbox"/> Own <input type="checkbox"/> Buy |
| <p>Glacier Glasses These are mandatory. Look for a pair that fits well and has side shields. The lenses should be dark enough to not let more than 10% of visible light through. Photochromic (variable tint) lenses are more expensive but are usable in a wider range of activities.</p> <p>☆ NOTE: Those using contact lenses should also bring a pair of prescription glasses in the event that your contacts or solutions are lost or damaged by freezing. If you only use prescription glasses, we recommend “OTG” (over the glass) or “Frame-over” style sunglasses.</p> | <input type="checkbox"/> Own <input type="checkbox"/> Buy |

| | |
|---|--|
| <p>Goggles Optional for early and late-season. These are used in high winds or heavy rain and can serve as a backup to your glacier glasses. Look for UVA/UVB protection and a lighter lens is recommended for better visibility in flat light.</p> | <input type="checkbox"/> Own <input type="checkbox"/> Buy |
| <p>Headlamp Bring extra batteries or if it has a rechargeable battery make sure and bring a charger. 200-350 Lumens is an ideal range.</p> | <input type="checkbox"/> Own <input type="checkbox"/> Buy |
| <p>Liner Glove Thin, lightweight, wool or synthetic gloves. Size to fit snug but not too tight. Generally worn alone in temperatures above 25°F(-4°C) when precipitation is not present. UPF rated liner gloves are ideal for sun protection. Bring 1-2 pairs.</p> | <input type="checkbox"/> Own <input type="checkbox"/> Buy |
| <p>Work Glove These gloves are used for belaying, tying knots, rope management, etc. Dexterity and durability are key. These gloves provide slightly more insulation than a liner glove and are generally used in temps of 15°F to 30°F(-9°C to -1°C) while actively using your hands. Look for a comfortable snug fit favoring dexterity and a durable leather or synthetic palm. Water-resistant material is recommended because they dry out faster than waterproof gloves.</p> | <input type="checkbox"/> Own <input type="checkbox"/> Buy |
| <p>Hard Shell Glove Waterproof and insulated gloves. If the glove lacks insulation then size it to fit a liner glove inside. Mainly worn in wet conditions, cold, or when not mobile.</p> | <input type="checkbox"/> Own <input type="checkbox"/> Buy |
| <p>Sports Bra Wool or synthetic, comfortable, active wear.</p> | <input type="checkbox"/> Own <input type="checkbox"/> Buy |
| <p>Base Layer Wool or synthetic shirt, long sleeves preferred, ideally a “sun hoody” with UPF 30+ sun protection.</p> | <input type="checkbox"/> Own <input type="checkbox"/> Buy |
| <p>Active Insulation Layer Lightweight “gridded fleece” or lightweight down or synthetic insulated jacket. Hood preferred. ★ Weight: 250g-350g ideal weight.</p> | <input type="checkbox"/> Own <input type="checkbox"/> Buy |
| <p>Soft Shell Jacket or Windshirt A soft shell is a weather resistant, breathable, and stretchy freedom of movement piece. This piece is versatile in the sense of movement. It is often called an “action layer.” It is weather resistant, meaning it can put up with light showers and wind. Also if it gets wet it dries fairly quickly. This enables you to not have to stop and put on another piece when the wind picks up or a light shower happens. Because it is water resistant, and not waterproof, it also breathes fairly well. This enables you to move without overheating, so you don’t have to constantly stop to change out layers to regulate body temperature. They are also made of a stretchy material so there are no restrictions to your movement during activity. Put all those together and you have a pretty versatile layer, the Soft Shell. Hood preferred. ★ Materials: Exolite, Matrix, Schoeller ★ Windshirt: Patagonia Houdini or similar.</p> | <input type="checkbox"/> Own <input type="checkbox"/> Buy |
| <p>Insulation Jacket AKA the “puffy.” Down or Synthetic. This piece is worn in cold conditions or when not moving. Hood preferred. If choosing Down, water-resistant Down treatment is preferred to help prevent matting and loss of insulating ability if the jacket gets wet.</p> | <input type="checkbox"/> Own <input type="checkbox"/> Buy |

| | |
|---|--|
| <p>☆ Weight: 350g-450g ideal weight.</p> | |
| <p>Hard Shell Jacket Non-insulated jacket with a waterproof and breathable membrane. Three layer construction is recommended. It must have a hood, ideally a helmet compatible hood. When sizing make sure it can fit over other layers. ☆ Materials: Gore-Tex, eVent, Drillite, H2NO, Pertex Shield</p> | <input type="checkbox"/> Own <input type="checkbox"/> Buy |
| <p>Undergarments Wool or synthetic.</p> | <input type="checkbox"/> Own <input type="checkbox"/> Buy |
| <p>Base Layer Pant (aka “Long Johns”) Wool or synthetic. Bring one for early or late-season conditions, optional for mid-season conditions (depending on the weather).</p> | <input type="checkbox"/> Own <input type="checkbox"/> Buy |
| <p>Soft Shell Pant Thin, weather-resistant, breathable, and stretchy. ☆ Materials: Exolite, Matrix, Schoeller</p> | <input type="checkbox"/> Own <input type="checkbox"/> Buy |
| <p>Hard Shell Pant Non-insulated, waterproof and breathable membrane. Full side zips are recommended. When sizing make sure to it is able to fit over a base layer and soft shell pants. ☆ Materials: Gore-Tex, eVent, Drillite, H2NO, Pertex Shield</p> | <input type="checkbox"/> Own <input type="checkbox"/> Buy |
| <p>Socks Wool or synthetic socks that are over the ankle height. Focus on getting insulation from the boot and using a lighter weight sock, instead of using a heavy weight sock for warmth. Wearing a “silk-weight” liner sock beneath your hiking sock can reduce friction on the skin directly and mitigate blister development. Bringing 3-4 pairs is recommended for this 12 day course. Two pairs mainly used while climbing that can be switched out if one gets wet. As well as having a 3rd or 4th pair to sleep in and as a backup.</p> | <input type="checkbox"/> Own <input type="checkbox"/> Buy |
| <p>Approach Shoes These will be used for approaches and some climbing. Look for approach shoes with “sticky rubber” on them as they will climb better. Waterproof approach shoes are not recommended. Size them to be snug and comfortable.</p> | <input type="checkbox"/> Own <input type="checkbox"/> Buy |
| <p>Mountaineering Boots Must be stiff, crampon compatible, mountaineering boots. Synthetic or plastic double boots recommended prior to July 1st. After July 1st, plastic or synthetic double boots are not recommended. ☆ NOTE: There are many makes and models out there and not all are created equal. Please consult with our Equipment Shop if you are uncertain about the acceptability of your chosen model.</p> | <input type="checkbox"/> Own <input type="checkbox"/> Buy <input type="checkbox"/> Rent* |
| <p>Gaiters Knee or calf height. Best used in early-season conditions. Optional for mid or late-season. Gaiters do help protect pants from crampon holes regardless of the season.</p> | <input type="checkbox"/> Own <input type="checkbox"/> Buy <input type="checkbox"/> Rent* |
| <p>Comfortable Pants or Shorts Comfortable cotton clothing that will be used in the front country and for car camping.</p> | <input type="checkbox"/> Own <input type="checkbox"/> Buy |

Climbing

Packing Checklist

Ice Axe

If you intend to continue on to on to AMTL II or higher, a slightly curved semi-technical ice axe like the Petzl Sum'Tec or the Black Diamond Swift is recommended for technical ascents. Fully Technical (T) rated axes are recommended. Adze is required. If you only plan on completing AMTL I and intend to avoid steeper mountaineering, a straight shaft ice axe like the Petzl Glacier or Black Diamond Raven is recommended. Please contact our Equipment Shop if you have any questions.

Use the following table as a rough guide on length. Ice axe leashes are not required and not recommended.

| Climber Height | Recommended Length of Axe | |
|-----------------|---------------------------|--------------------|
| | Straight Shaft Axe | Semi-Technical Axe |
| 5'8" or shorter | 50-55cm | 50cm |
| 5'9"- 6' | 55-60cm | 52cm |
| 6'1"-6'3" | 60-65 cm | 55-57cm |
| 6'4" and up | 65-68cm | 60cm |

- Own
- Buy
- Rent*

Ice Tool

One is required. If you have two then bring two. If you are bringing only one then a hammer version is desired since your ice axe should have an adze.

- Own
- Buy
- Rent*

Harness

Make sure the harness has a belay loop and gear loops. When sizing make sure it can fit over your clothing layers when you have multiple layers on.

- Own
- Buy
- Rent*

Helmet

Must be UIAA rated for climbing.

- Own
- Buy
- Rent*

Rock Shoes

Focus on comfort, so they can be worn all day. Avoid technical or aggressive rock shoes with a downturn. Avoid curled toes when sizing.

- Own
- Buy
- Rent*

Crampons

Must be steel crampons with front points and compatible with your mountaineering boots.

- Own
- Buy
- Rent*

Cordellete

Bring two. 18–20 feet lengths of 7mm cord. 5.5mm Tech cord acceptable

- Own
- Buy

| | |
|---|--|
| <p>Slings Bring one 48in.(120cm) and one 24in.(60cm) pre-sewn nylon sling. Slings must be UIAA rated for climbing.</p> | <input type="checkbox"/> Own <input type="checkbox"/> Buy |
| <p>Belay Device Bring an auto-blocking device that accepts two ropes like the Petzl Reverso or Black Diamond ATC Guide.</p> | <input type="checkbox"/> Own <input type="checkbox"/> Buy |
| <p>Carabiners Must be UIAA rated for climbing. - Four large pear shaped munter-style locking carabiners, minimum. - Five non-locking wire gate carabiners, minimum. *If you have more lockers and non-lockers, bring them.</p> | <input type="checkbox"/> Own <input type="checkbox"/> Buy |
| <p>Trekking Poles One is required, but two are highly recommended. These increase balance while wearing a heavy pack and making stream crossings, while also decreasing pressure on the knees during steep descents. For the early-season, your poles should have a snow basket.</p> | <input type="checkbox"/> Own <input type="checkbox"/> Buy <input type="checkbox"/> Rent* |
| <p>Prusiks 6mm nylon cord in three lengths; 13 ft, 6 ft, 5 ft. Available at AAI the morning of the course. We recommend getting three different colors for easy identification.</p> | <input type="checkbox"/> Own <input type="checkbox"/> Buy |
| <p>Day Pack 25L to 35L is an ideal size. This will be used during rock climbing portions and can also be used as a summit pack.</p> | <input type="checkbox"/> Own <input type="checkbox"/> Buy |
| <p>Internal Frame Pack 50L or more. Mountaineering specific packs instead of backpacking packs are a good way to shave weight. Should also have to ability to carry weight well (45 lbs+).</p> | <input type="checkbox"/> Own <input type="checkbox"/> Buy <input type="checkbox"/> Rent* |
| <p>Rappel Backup Sterling Hollow Block 13.5” or 4ft length of 6mm nylon accessory cord. Must be nylon, Dyneema has a lower melting point. This is used as a rappel backup, the Sterling Hollow Block is recommended for its heat resistant properties.</p> | <input type="checkbox"/> Own <input type="checkbox"/> Buy |
| <p>Belay Gloves Lightweight and breathable glove with a durable leather palm. They protect your hands from rope burn, pinching, and sharp elements.</p> | <input type="checkbox"/> Own <input type="checkbox"/> Buy |
| <p>Assisted Braking Device If you have a Petzl GriGri or similar assisted braking device bring it with you for front country climbing.</p> | <input type="checkbox"/> Own <input type="checkbox"/> Buy |
| <p>Nut Tool For removing gear from the rock.</p> | <input type="checkbox"/> Own <input type="checkbox"/> Buy |
| <h2 style="margin: 0;">Aid Equipment</h2> <p style="margin: 0;">The more personal gear you have, the better. Please bring any and all aid climbing equipment that you own. If you do not have equipment, then we can provide it.</p> | |
| <p>Packing Checklist</p> | |

| | |
|--|--|
| <p>Ascenders Mechanical ascenders with handles.</p> | <input type="checkbox"/> Own <input type="checkbox"/> Buy |
| <p>Daisy Chains Bring two. There are many different types and models and all have their pro's and cons. Bring a pair of the same model in different colors. Preferably Nylon. Longer is better, around 140cm. Speed daisies not recommended.</p> | <input type="checkbox"/> Own <input type="checkbox"/> Buy |
| <p>Aiders Bring two. Again, a pair of the same but in different colors is better. Ladder-style with spreader bars are strongly recommended for sustained wall climbing, as are sewn ladders instead of adjustable ones.</p> | <input type="checkbox"/> Own <input type="checkbox"/> Buy |
| <p>Fifi Hook Bring one attached to a sewn loop instead of an adjustable one.</p> | <input type="checkbox"/> Own <input type="checkbox"/> Buy |
| <h2 style="margin: 0;">Camping</h2> | |
| Packing Checklist | |
| <p>Tent 3 season tents can be used if the rain flies goes all the way to the ground on all sides. A "bathtub" floor for the inner tent is also recommended. This means that the inner tent isn't all mesh but has water resistant floor material that scoops up from the floor for 4-12" before changing to mesh, like a bathtub. If there are any questions please consult our Equipment Shop to see if your tent is okay to use. <u>-Early-season:</u> Double wall 4 season tent recommended. <u>-Mid-season:</u> 4 season or 3 season tent. <u>-Late-season:</u> 4 season tent recommended.</p> <p>☆ NOTE: 4 season tents are available to rent at AAI the morning of the course. There is also the possibility to pair up with other students on your course and share a tent.</p> | <input type="checkbox"/> Own <input type="checkbox"/> Buy <input type="checkbox"/> Rent* |
| <p>Sleeping Bag Synthetic or Down. If you bring a synthetic bag bring one on the lower end of the temperature range since synthetic bags tend not to be as warm as Down. If you sleep cold it is recommended that you bring a warmer bag than required for the seasonal conditions. If choosing Down, water-resistant Down treatment is preferred to help prevent matting and loss of insulating ability if the sleeping bag gets wet. <u>-Early-season:</u> 0°F to 20°F (-18°C to -6°C) <u>-Mid-season:</u> 20°F to 30°F (-6°C to -1°C) <u>-Late-season:</u> 15°F to 20°F (-10°C to -6°C)</p> | <input type="checkbox"/> Own <input type="checkbox"/> Buy <input type="checkbox"/> Rent* |
| <p>Compression Stuff Sack For your sleeping bag. If it is a Down bag, a waterproof compression sack is recommended.</p> | <input type="checkbox"/> Own <input type="checkbox"/> Buy |
| <p>Sleeping Pad</p> <ul style="list-style-type: none"> <input type="checkbox"/> <u>Early-season:</u> Bring two; one inflatable and one closed cell foam. The foam pad helps insulate from the snow and serves as a backup to the inflatable pad. <input type="checkbox"/> <u>Mid or late-season:</u> One inflatable or closed cell foam pad. | <input type="checkbox"/> Own <input type="checkbox"/> Buy <input type="checkbox"/> Rent* |

| | |
|---|--|
| <p>Stove and Fuel Liquid fuel or canister stove. Fuel is available at AAI the morning of the course.</p> <p>☆ NOTE: Many people choose to share stoves, fuel and tents to decrease weight. However, some people prefer to camp in their own tents and use their own stoves. This can be determined on the morning of the first day of your program.</p> | <input type="checkbox"/> Own <input type="checkbox"/> Buy <input type="checkbox"/> Rent* |
| <p>Pots Bring one pot.</p> <ul style="list-style-type: none"> <input type="checkbox"/> <u>Early-season:</u> Bring a bigger pot for melting snow; 1.5L to 2L <input type="checkbox"/> <u>Mid or late-season:</u> 0.5L to 1L <p>☆ NOTE: If you have a complete stove system like the Jetboil or MSR Reactor and plan on eating out of your integrated pot, then you do not need to bring a pot.</p> | <input type="checkbox"/> Own <input type="checkbox"/> Buy |
| <p>Utensils Don't forget the official "most forgotten item ever;" the spoon, or spork.</p> | <input type="checkbox"/> Own <input type="checkbox"/> Buy |
| <p>Bowl</p> <ul style="list-style-type: none"> <input type="checkbox"/> <u>Early-season:</u> Bring a plastic bowl or mug, preferably with insulation. <input type="checkbox"/> <u>Mid or late-season:</u> Bring a plastic bowl, insulation is not necessary. <p>☆ NOTE: If you have a Jetboil or MSR Reactor type stove and plan on eating out of your integrated pot, then you don't need to bring a bowl. The same applies if you plan on only using commercially packaged dehydrated or freeze-dried meals.</p> | <input type="checkbox"/> Own <input type="checkbox"/> Buy |
| <p>Lighters Bring two. You will have the opportunity to buy them the morning of the course.</p> | <input type="checkbox"/> Own <input type="checkbox"/> Buy |
| <p>Hydration 3L capacity is recommended, though some people need more and some people need less.</p> <p>Some people bring a bladder and a hard sided bottle. The bottle is an important backup to the bladder if it gets punctured. A hard-sided bottle may also double as a mug for hot water, though not every bottle is designed to hold boiling water.</p> <p>For Camelbak style hydration bladders, bring a drinking tube insulator, as the tube can freeze up. Drinking tubes must also have a lock on the bite valve. If you choose to use this system, be aware that they require constant vigilance in order to avoid freezing. Some people are not very good at this. Blow the water out of the tube after every use and place the bite valve in the neck of your shirt to keep from freezing.</p> <p><u>-Early-season:</u> Bring more water carrying capacity (3L to 4L) to reduce the number of times you need to melt snow.</p> | <input type="checkbox"/> Own <input type="checkbox"/> Buy |
| <p>Water Purification Water purification tablets are recommended, they are available at the shop the morning of the course. Pills that take an hour or less to purify are recommended. Steripens are an acceptable alternative to purification tablets.</p> <p>☆ NOTE: Pumps can be damaged by silt in the glacial water.</p> | <input type="checkbox"/> Own <input type="checkbox"/> Buy |
| <p>Food You are responsible to bring your own food for the duration of the course. Please consult our meal planning page.</p> | <input type="checkbox"/> Own <input type="checkbox"/> Buy |

You should arrive on the first morning of your course with at least five-days of backcountry food and at least one-day's worth of front country food.

Alpine Mountaineering and Technical Leadership courses are run in both the front and backcountry. There will be several opportunities to resupply at grocery stores during the program, so you don't need to arrive with 12-days of food. However, it is unlikely that you will find "just-add-boiling-water" style meals once we depart from AAI. If that is going to be a staple of your program food, you may wish to bring eight or nine days worth of those kinds of meals.

Many AMTL courses decide to go out to dinner once or twice during the program.

Other Essentials

Packing Checklist

Map and Compass

Maps can be purchased at our store the morning of. Compass must have declination adjustment.

- Own
 Buy

☆ NOTE: All three items are available together in a bundle, or all sold separately, at AAI the morning of your course.

Toothbrush and Toothpaste

Travel size recommended.

- Own
 Buy

Hand Sanitizer and/or Wet Wipes

Required. Used after going to the bathroom and before eating. Wet wipes can be used for the "mountain shower."

- Own
 Buy

Toilet Paper

The provided solid waste bags have a small amount of toilet paper with them, but most people do not find this to be adequate. Estimate how much you'll need for a program of this length and place that in a plastic zip lock bag. An extra zip lock bag can be helpful for pack-out of used paper.

- Own
 Buy

Sunscreen

SPF 30+, zinc based is preferred. Small travel size tubes are recommended so you can put them in a close by pocket for easy access.

- Own
 Buy

Lip Balm

Make sure it is SPF rated.

- Own
 Buy

Personal First Aid Kit

- Band aids
- Blister treatment
- Prescription drugs
- Ibuprofen etc.
- If you wear contacts make sure and have spares if you can't see without them.

- Own
 Buy

Repair Kit

- Inflatable sleeping pad patch kit
- Duct tape (Can be wrapped around trekking poles or water bottle. Gorilla Tape tends to be the best brand for the mountains.)
- Zip ties

- Own
 Buy

- 6-10ft of 3mm accessory cord
- 2 Trash bags that are big enough to line the inside of your pack with.

Other Optional Items

The items below are not required, although many are nice “luxury” items that can make your expedition more enjoyable. Remember that a few ounces here and there add up to extra pounds on your back and knees during your expedition.

Packing Checklist

Rock Climbing Rack

If you have it then bring it. Make sure and mark your gear so it doesn't get mixed up. Nail polish works well for marking, electrical tape tends to turn into trash. Bring any specialty or 'micro' traditional protection. Examples: Hooks, micro stoppers, brass nuts, balls nuts, offset cams or totem cams.

- Own
- Buy

Ice Climbing Rack

If you have it then bring it. Make sure and mark your gear so it doesn't get mixed up. Nail polish works well for marking, electrical tape tends to turn into trash.

- Own
- Buy

V-thread

A reliable threading tool and some additional cordelette is good to have so you are prepared when we have the opportunity to practice. If you do not have one, it is not necessary.

- Own
- Buy

Altimeter Watch

If you have one then bring it, it is a great tool to have in the backcountry especially for navigation.

- Own
- Buy

Gaia Navigation App

Optional Smartphone App. Please have the following maps downloaded prior to the start of your course:

- Own
- Buy

Pee Bottle

Used at night or when the weather is poor so you don't have to get out of your tent.

- Own
- Buy

Women's Specific Items

Female Urination Device

Pee funnel such as the GoGirl or Freshette. Many female guides prefer a rigid pee funnel.

[Click here for more info](#)

Menstruation Collection Cup

There are many things to consider concerning backcountry menstruation.

[Click here for more info](#)

- Own
- Buy

Entertainment

Books, games, cards, music player, kindle, etc. For evenings or rainy days in the tent.

- Own
- Buy

| | |
|--|--|
| <p>Portable Charging Device Phone charger, battery pack, or solar panel.</p> <p>☆ NOTE: Solar panels should only be used to charge battery packs. Battery packs should be used to charge devices. Inappropriate use of a solar panel could lead to the depletion of a device's power.</p> | <input type="checkbox"/> Own <input type="checkbox"/> Buy |
| <p>Ear Plugs For defense against snoring and high winds.</p> | <input type="checkbox"/> Own <input type="checkbox"/> Buy |
| <p>Insect Repellent Biting insects such as mosquitoes and blackflies can be prevalent during different times of the season depending upon conditions and location. This is a nice item to have just in case.</p> | <input type="checkbox"/> Own <input type="checkbox"/> Buy |
| <p>Camera Phone cameras or small point-and-shoot cameras are preferred. SLR cameras are not recommended due to their size and bulk.</p> | <input type="checkbox"/> Own <input type="checkbox"/> Buy |
| <p>Comfortable Clothing and Footwear Breathable footwear -- like flip-flops -- as well as some comfortable cotton clothing can be nice to change into after you get back to the van.</p> | <input type="checkbox"/> Own <input type="checkbox"/> Buy |
| <p>Car Charger Consider bringing an extra battery pack as well, having a lot of people using car charger cables is difficult.</p> | <input type="checkbox"/> Own <input type="checkbox"/> Buy |
